## **NOTICE OF CONSTRUCTION and TRAFFIC ALERT** **Last Two Phases of Kings Run Project Starting** **in College Hill and Winton Hills**

CINCINNATI – MSD will begin constructing four stormwater detention basins and new storm sewers in College Hill and Winton Hills this summer. MSD will also begin installing an underground combined sewer overflow (CSO) storage system and performing stream stabilization work along the Kings Run stream in the Wooden Shoe neighborhood of Winton Hills. The work is expected to be completed by spring 2019.

This construction is part of a federally mandated, multi-phased project, known as the Kings Run Project or CSO 217/483 Sewer Separation, that will reduce combined sewer overflows (CSOs) into the Kings Run stream and the Mill Creek. The Kings Run Project also includes current sewer construction work along Winton Road, Winton Ridge Lane, and Kings Run Drive.

Once completed, the Kings Run Project will control 85-90% of the combined sewer flows into the Kings Run stream and the Mill Creek, restore Kings Run as a tributary of the Mill Creek, and improve water quality in both streams.

*Please see the attached project maps for details.*

The construction contractor for Phase A (stormwater detention basin/storm sewer work) is Sunesis Construction. The following traffic impacts will occur.

- Closure of the southbound curb lane of Winton Road from south of Dutch Colony Drive to the entrance to Cincinnati Coin Laundry through the summer.
- Closure of Argus Road between Cedar Avenue and Elda Lane for a minimum of 30 days starting in July. Access to the Golden Leaf Baptist Church will be from the south only on Argus Road. Access to the residential neighborhood off Homeside/Atwood Avenue will be from Cedar Avenue. Through traffic will be detoured via Cedar Avenue, Lantana Avenue, and West North Bend Road.

The construction contractor for Phase B (underground CSO storage system and stream stabilization work) is Howell Contractors, Inc. There are no road closures or lane restrictions associated with Phase B; however, there will be construction traffic on Winton Road during material deliveries.

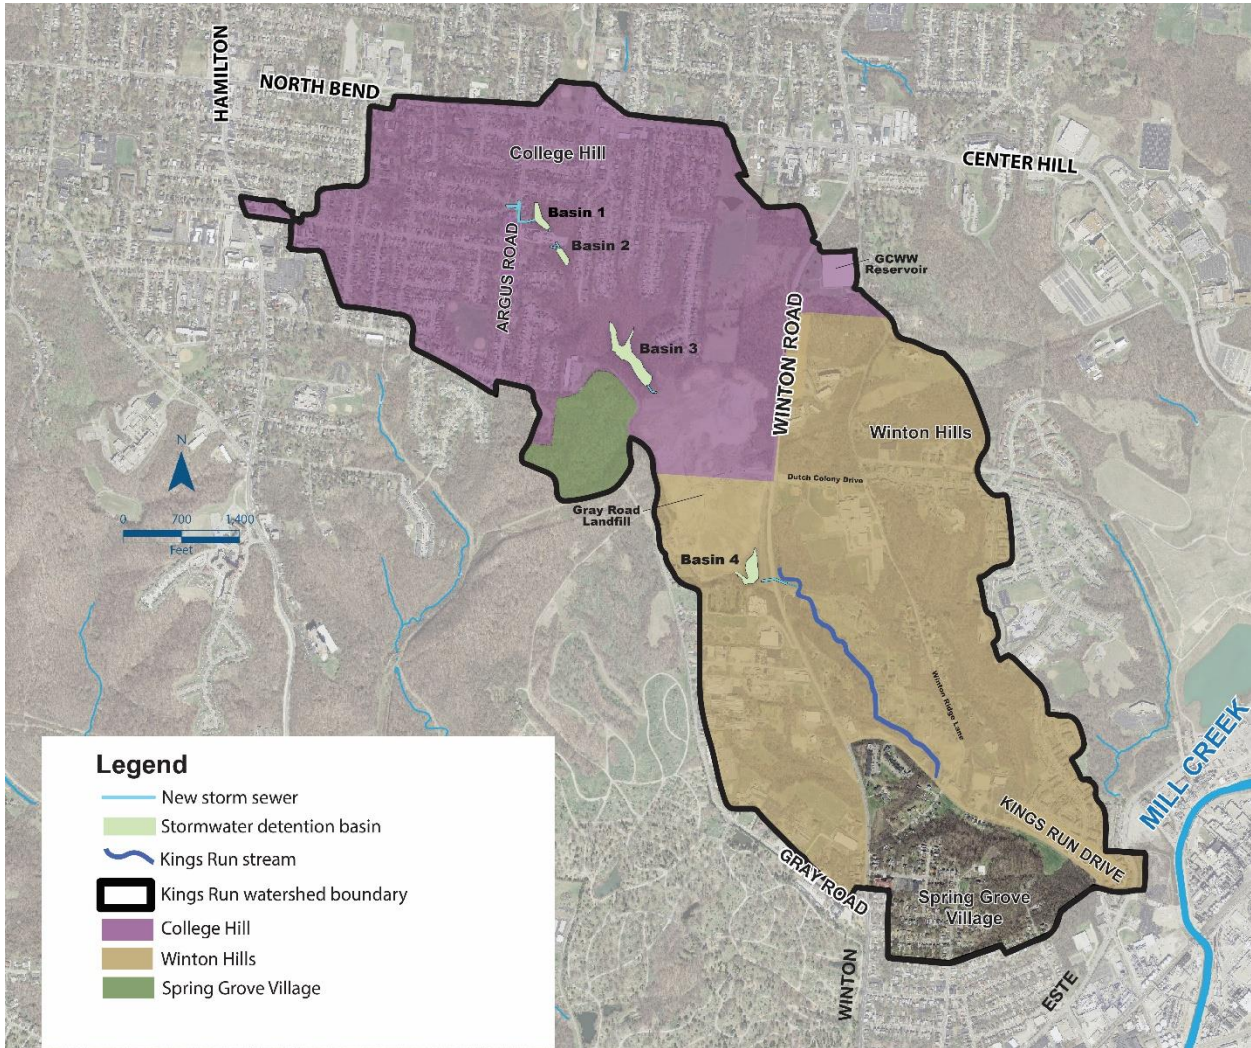

In addition to traffic inconveniences, typical construction-related disturbances such as noise, dirt and vibrations should be expected throughout the construction period.

These projects are part of Project Groundwork, MSD's multi-year plan to reduce sewer overflows into streams and rivers in Hamilton County. Project Groundwork will protect public health, improve our local streams and rivers and enhance our communities.
