Notice of Construction – East End

Little Miami Treatment Plant Upgrades July 2019 – Spring 2021

CINCINNATI – The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin several projects to upgrade the Little Miami Wastewater Treatment Plant in the East End this month. All the projects are expected to be completed by spring 2021, pending weather and field conditions.

Please see the attached project map.

Construction activities will generally occur between 7:30 a.m. and 5:00 p.m. Monday through Friday.

MSD's contractor, Dugan & Meyers, LLC, will upgrade the plant's preliminary treatment process by replacing the fine screens and constructing a new grit removal system. The same contractor will also construct a new electrical building and install electrical equipment. These improvements are scheduled to be completed by spring 2021.

MSD's contractor, Sunesis Construction Company, will repair the 72-inch-diameter main outfall sewer that discharges treated water from the Little Miami plant to the Ohio River. This work will primarily take place along Lumsden Street and is scheduled to be completed by December 2019.

No traffic disruptions are anticipated, but typical construction-related disturbances such as noise, dirt and vibrations should be expected throughout the construction period.

These projects are part of Project Groundwork, MSD's multi-year plan to reduce sewer overflows into streams and rivers in Hamilton County. Project Groundwork will improve the quality of our lives through cleaner streams, improved protection of public health, and enhancement of the communities where we live, work, and play.

For additional information about the MSD project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov.
