MSD Notice of Construction

Ludlow and Lafayette Parallel Sewer Project

CINCINNATI – The Metropolitan Sewer District of Greater Cincinnati (MSD) will be upgrading the sewer system along Middleton and McAlpin avenues in the Clifton neighborhood of the City of Cincinnati. About 1,900 linear feet of new 24-inch-diameter sewer will be constructed, and 350 feet of storm sewer outfalls will be upsized in Rawson Woods. The sewer installation is expected to start early April 2018, with completion in the summer of 2018.

Please see the attached map.

Clearing of trees along the alignment in Rawson Woods is necessary prior to the start of sewer installation. This work will start beginning this week and be completed before the end of March 2018. Every effort will be made to preserve as many trees as possible along and adjacent to the alignment. Sewer installation will begin immediately following the completion of the tree clearing.

MSD's construction contractor is Brackney, Incorporated. We anticipate construction activity will occur generally between 7:00 a.m. and 5:00 p.m. Monday through Thursday. Some weekend work may be needed.

In addition to traffic inconveniences, typical construction-related disturbances such as noise, dirt and vibrations should be expected throughout the construction period.

This project is part of Project Groundwork, MSD's multi-year plan to reduce sewer overflows into streams and rivers in Hamilton County. Project Groundwork will protect public health, improve our local streams and rivers and enhance our communities.

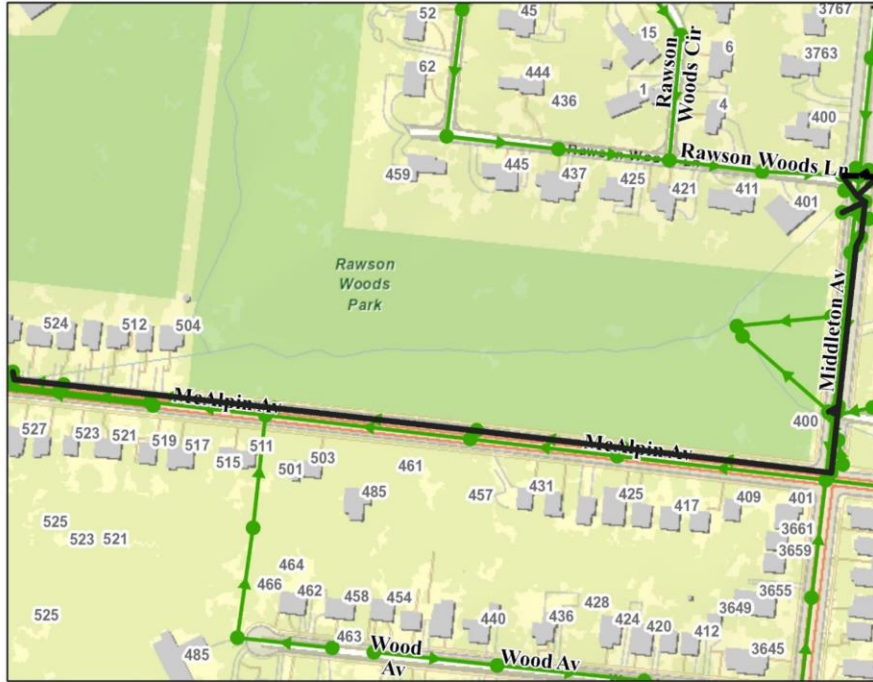

For additional information about the project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov.
