MSD Lick Run Project Update: Construction to Start Along Quebec Road

CINCINNATI – The Metropolitan Sewer District of Greater Cincinnati (MSD) will begin installing new storm sewers along Quebec Road and adjacent side streets in early January 2018. Construction will be completed by the end of 2018, with repaving and final restoration in spring 2019.

The work will occur between Westwood Avenue in South Fairmount and Atson Lane in West Price Hill. *See attached project map.* The storm sewers will collect rainwater from Quebec Road and side streets and ultimately convey it to the Lick Run Greenway in South Fairmount.

This effort, part of the Lick Run Project (www.projectgroundwork.org/lickrun), will keep stormwater out of MSD's combined sewer system and help reduce combined sewer overflows (CSOs) into the Mill Creek.

MSD's construction contractor is Sunesis Construction. The project will begin with the relocation of a water main at the intersection of Westwood Avenue and Quebec Road, followed by installation of storm sewers along Quebec Road and side streets.

Construction will occur primarily Monday through Friday during daylight hours, depending on weather and the contractor's schedule. Work on weekends may be necessary at times. The water main relocation may involve some night work (7 p.m. – 6 a.m.)

Thru traffic will be detoured to Sunset Avenue, as Quebec Road will be closed in sections as construction progresses along the roadway. Local access to homes and businesses will be maintained at all times, but delays may occur. Depending on where construction is occurring along Quebec Road, access may be easier from Glenway or Westwood avenues.

For additional information about the project, please contact MSD Engineering Customer Service at (513) 557-3594 or MSD.Communications@cincinnati-oh.gov or visit www.projectgroundwork.org/lickrun.
